**Michelle Jones Singer Expands Indianapolis Medical Practice to Include Cosmetic Surgery
New Treatments and Procedures Include Liposuction, Breast Augmentation and Tummy Tucks**

INDIANAPOLIS - Cosmetic Surgery of Indianapolis recently expanded to offer a full array of affordable, non-invasive cosmetic surgery treatments and procedures including liposuction, breast augmentation, tummy tucks, microdermabrasion, Botox injections and Restylane cosmetic fillers. All procedures are performed or overseen by Dr. Michelle Jones Singer, M.D., an Indiana licensed cosmetic surgeon and board certified medical doctor in the privacy and comfort of Dr. Jones Singer's office in Fishers, Indiana.

"All of our cosmetic surgery procedures and treatments are affordable so everyone has the ability to improve their body, image and outlook on life," commented Dr. Jones Singer. "Cosmetic surgery isn't just for the rich. Not only are our procedures affordable, they are also non-invasive and only require local numbing so our patients experience less pain, less bruising and less recovery time. This means they can get back to work and their lives faster."

Cosmetic Surgery of Indianapolis is one of the only centers in the area to provide affordable, non-invasive cosmetic surgical procedures. In fact, Dr. Jones Singer is the only licensed cosmetic surgeons in Indianapolis to earn a certification in the innovative VASER liposculpture technology. This affordable liposuction technique gently removes fat from many body areas, including chins, arms, waists, hips, knees, buttocks, love handles, thighs, stomachs, and more. The procedure allows for additional contouring around muscles for a more precise and sculpted result.

In addition, Cosmetic Surgery of Indianapolis offers affordable, non-invasive tummy tucks, including partial and mini tummy tucks. Dr. Jones Singer specializes in minimally invasive liposuction tummy tucks and abdominoplasty which result in less pain, less bruising and less downtime.

The Indianapolis cosmetic surgery center also offers a variety of affordable, non-invasive breast augmentation procedures including breast enhancements, breast lifts, breast enlargements and breast implants. These procedures are performed in the privacy of Dr. Jones Singer's office and only require local numbing agents.

Cosmetic Surgery of Indianapolis serves both men and women. Procedures and treatments popular with men include liposuction and liposculpture; waist contouring; abdominal etching; partial or mini tummy tucks and abdominoplasty; and Botox and Restylane injections. Dr. Jones Singer specializes in the treatment and reduction of those who have gynecomastia – or male enlargement of the breasts.

The Indianapolis cosmetic surgery center also offers affordable Botox injections as well as Restylane cosmetic fillers injections. The Botox and Restylane treatments can help correct crow's feet, laugh lines, frown lines, wrinkles, lip lines and loose or sagging skin. In addition, the Indianapolis cosmetic surgery clinic offers affordable microdermabrasion treatments to smooth skin, even tone and texture, lighten up dark spots and create a fresh, more youthful appearance.

About Cosmetic Surgery of Indianapolis

Cosmetic Surgery of Indianapolis offers a full array of affordable and non-invasive cosmetic surgery procedures and treatments. Our innovative techniques ensure less pain and faster recovery. We specialize in liposuction and liposculpture; breast augmentations, lifts, enhancements and implants; partial and mini tummy tucks; Botox injections; Restylane injections and cosmetic fillers; and microdermabrasion for both men and women. All of our procedures are performed by licensed doctors and board-certified cosmetic surgeons. We serve the greater Indianapolis metropolitan area including Fishers, Carmel, Geist, Noblesville, Castleton and Zionsville. The medical practice is managed by Michelle Jones Singer, M.D., an experienced cosmetic surgeon and Ob/Gyn with more than 20 years of experience.
